

Oziel Law Boosts Efficiency and Billable Hours with Anaqua's WiseTime

Oziel Law, a boutique legal firm in Toronto specializing in high-growth startups, faced challenges with manual and error-prone timekeeping as its operations expanded. To improve efficiency and ensure accurate billing, the firm adopted Anaqua's **WiseTime**®, an AI-powered autonomous time tracking solution. By automating time capture, integrating seamlessly with Clio®, and reducing administrative overhead, WiseTime enabled Oziel Law to boost billable hours by up to 10% while streamlining workflows and enhancing client service.

CHALLENGES

Timekeeping That Couldn't Keep Up

As Oziel Law grew, so did the complexity of its operations. Attorneys frequently switched between tasks, platforms, and communication channels—making manual time tracking stressful and error-prone. The firm's existing practice management software offered basic docketing and timers, but it relied heavily on memory and manual input.

"We realized we weren't capturing as much billable time as our team was working. We needed a solution that was easier, more accurate, and defensible."

SOLUTION:

WiseTime | AI-driven Autonomous Time Tracking

After evaluating multiple options, Oziel Law selected WiseTime for its AI and automation capabilities, seamless integration with Clio, and commitment to continuous improvement. WiseTime automatically tracks activity across documents, emails, and apps—without requiring timers or manual entries.

Automated Time Capture:

Tracks activity in the background, freeing attorneys from manual logging.

Matter Auto-Tagging:

Automatically associates activities with the correct Matter ID.

AI Narratives:

Generates summary descriptions of work performed, which attorneys can fine-tune.

User-Friendly UI:

Offers a clear daily overview of total, unposted, and posted time entries.

Timesheet Management:

Allows users to group multiple activities into a single timesheet entry.

RESULTS

More Billable Hours, Less Admin

WiseTime helped Oziel Law improve time capture accuracy and reduce administrative overhead. While exact ROI is hard to quantify due to team growth, the firm reports up to a 10% increase in billable hours and greater operational efficiency.

The integration with Clio also streamlined workflows and reduced errors, while WiseTime's intuitive interface made adoption seamless across the team.

“WiseTime is probably the easiest software to evaluate ROI on. If each timekeeper captures even one extra billable hour per week, it more than pays for itself.”

LOOKING AHEAD

“Anaqua listens. Their responsiveness builds trust and gives us confidence that our inputs are valued and acted on.” (Allan Oziel)

Oziel Law values Anaqua's commitment to evolving WiseTime based on client feedback. One of the areas of enhancement that Oziel Law asked for was the analytics and reporting capabilities from WiseTime. They are pulling data from multiple systems, so the firm wanted to have the ability to run consolidated reports from a single platform.

Anaqua has recently released WiseTime's Enterprise Data Connect, an integration that supports users by having posted time data available in their reporting tool of choice through Google BigQuery.

Anaqua's WiseTime addresses the unique challenges that law firms face when it comes to balancing productivity and profitability with clients' needs. Designed for high-performing legal environments, WiseTime seamlessly captures billable activities without disruption, increasing revenue while reducing the administrative burden of your busy team members. With the capability to integrate with your existing practice management or billing system, WiseTime ensures immediate ROI through enhanced billing accuracy, reduced profit leakage and increased client satisfaction.
